

GoTo Resolve Microsoft Teams App Instructions

Use this document to get started with the GoTo Resolve Microsoft Teams app. This document includes guides for:

- 1. <u>Setting up the GoTo Resolve app in your Teams environment</u>
- 2. <u>Agent instructions</u>
- 3. Employee or end user instructions

Setting up the GoTo Resolve app in your Teams environment

- Create new teams/channels in Microsoft team, one for each help desk service. For example, if you plan to have four helpdesk services, such as IT-help, HR-help, Finance-help and Facilities-help, then you will create four teams.
 - IT-help
 - HR-help
 - Finance-help
 - Facilities-help
- 2. Add all of your employees to this channel. This channel will be used for creating tickets
- 3. Create triage teams.

For example, in the scenarios above, create four more teams

- a. IT-help-triage
- b. HR-help- triage
- c. Finance-help- triage
- d. Facilities-help- triage
- 4. Add respective agent/technician to these four triage channels. Whenever any ticket is created, agents will get alert in these teams.

- 5. Install GoTo Resolve app for Microsoft Teams:
 - Find the GoTo Resolve app in the Microsoft AppSource <u>here</u>
 - Or directly within your MS Team app <u>here</u>
- 6. Add the GoTo Resolve app to all the teams/channels you created (i.e., IT-help, IT-helptriage, etc.)

7. Configure these four-triage channel to receive the alerts

b. Select GoTo Resolve app

c. Select/type sign in

d. Sign In card will appear

e. Clicking on Sign In will redirect to Sign-In Window

• • •	Secure Sign In	
authentication.logmeini	nc.com/login?service=ht	tps%3A%2F%2Fa

unconfigure channel	Remove GoToResolve service category mappin
+ Create Ticket	Create Ticket

h. You will receive a card with list of services

	Select an option	\ \
1	IT Helpdesk	
	HR Helpdesk	
P	Finance Helpdesk	
	Facilities Helpdesk	

i. Select one of the services (Say IT Helpdesk) and click submit. You will receive this if successful.

Agent Instructions

- 1. An admin has already created specific triage teams/channels for each helpdesk service and configured the GoTo Resolve in those channels.
- 2. For every ticket that gets created, notifications are posted on these triage channels.
- 3. An agent can go to respective triage channels and start responding to tickets. agent/technician can assign, comment, and request a remote session.
- 4. If an agent would like to see all the tickets assigned to them, they must first add the GoTo Resolve app to their Teams account from the app store.
 - a. Navigate to "Apps" in Microsoft Teams
 - b. Select the GoTo Resolve app
 - c. Click the "Add" button on the top left.
 - d. GoTo Resolve can then be access from their side bar

Employee /End User Instructions

- 1. Admin has created specific channels where all employees can ask the question.
- 2. Employees can go to those channels and start creating tickets.
 - a. click "New conversation"
