

# Automatic access. Seamless sign-on.

The advantages of Active Directory integration for GoToMeeting

Almost every company uses Microsoft's Active Directory system. Think of it as a single phone book for all the people and computers on a network. It stores information, controls access and generally makes life easier for IT.

With GoToMeeting, your IT team can use our Active Directory integration to keep things simple.

- Easily manage large numbers of users
- Automatically add new users to GoToMeeting
- Let employees use their existing company login
- Remove accounts quickly when people leave
