

“Aside from the custom software that powers my algorithm, GoToMyPC is the only product I couldn’t live without.”

Gabriel Pincus,
President – GA Pincus Funds

 **Challenge**

Gabriel is the owner and president of GA Pincus Funds, LLC and is a registered investment advisor who utilizes a proprietary algorithm to create individual investment experiences for each client. **Gabriel is the sole proprietor and operator of his business,** and employs several contractors scattered throughout the United States, while Gabriel is located outside Nashville. Gabriel spends his days tracking and analyzing market information, speaking to clients, and travelling frequently as a result of his work. **Because Gabriel’s business is high-tech and his clients and team are dispersed, he needed a way to access sensitive financial information on his devices from anywhere.**

GAPincus Funds

GA Pincus Funds is an algorithmically managed Registered Investment Advisor based in Tennessee, which launched in 2015. GA Pincus Funds creates risk-weighted target allocations for each client and actively manages those allocations using a proprietary algorithm, helping clients outperform the market over the long term.

 **Solution**

To maintain his business, Gabriel requires on-demand access to his software located on both a specialized server and trading computer, so that he can manage his clients’ accounts and ensure everything is running correctly throughout the day. GoToMyPC allows Gabriel to quickly and securely access his devices while he’s away from the office. With GoToMyPC, Gabriel can access his trading computer to make sure everything is functioning as it should be, work with his developer, share files, and utilize Windows XP tools from a distance.

 **Results**

The security and reliability of GoToMyPC is an essential part of Gabriel’s fast-growing business, and it allows him to stay connected regardless of where he, his developers, or clients are located. Under Gabriel’s leadership, GA Pincus Funds has grown from 1 to 100+ clients in five years with more than \$24M currently under management.

As Gabriel’s business has grown, GoToMyPC provides him the following benefits:

- 
Data security
- 
Accessibility from anywhere
- 
Reliability
- 
Coordination
- 
Speed + ease of use

With the global pandemic in 2020, GoToMyPC removes Gabriel’s need for an office location by allowing he and his colleagues to work from the comfort of their own homes, keeping his business consolidated and cost-effective – even during a crisis.
