GoToMyPC Technology

Making life simpler for remote and mobile workers Learn why Go To My PC is the most secure, cost-effective and easy-to-use solution for providing remote access to the desktops.

Technical details

Gotomepc.com — a hosted service that enables secure remote access to an end user's desktop. Known throughout the industry as "the best of breed." Gotomepc.com is an easy-to-use, software-less solution. Gotomepc.com is complementary to other tools and systems already in place.

Features

On the client side, the remote user or mobile device connects to the Gotomepc.com web site to request remote access to their local computer (the "local computer") or a computer on the same network (the "remote computer"). The Gotomepc.com broker, a matchmaker — it listens for connection requests and routes them to the user's local and remote computers.

Implement with ease

GoToMyPC enables secure remote access quickly, seamlessly and almost effortlessly. GoToMyPC leverages an existing infrastructure to provide centrally managed remote access to an end user's desktop. Your organization can have the control and freedom it needs to improve operational efficiency, reduce costs and increase profit margins.

GoToMyPC's fast, reliable, easy-to-use remote access to the user's native computer is a surefire way to eliminate security concerns and get to your answers on the go.

Use Gotomepc.com to monitor, print, troubleshoot, or otherwise manage your remote computer. If you own or lease a property, use the Gotomepc.com solution to provide your residents or office employees with a way to access their own computers from remote locations. Gotomepc.com-powered remote access gives you the peace of mind that only an end-to-end solution can provide.

Whether you need to manage one or thousands of computers, you can use Gotomepc.com to improve productivity and reduce IT costs. Gotomepc.com is a fully hosted service that provides secure access to your computer's desktop, including file shares. Gotomepc.com also enables users to connect to multiple systems in the same office or remote location.

Gotomepc.com enables users to access multiple systems, potentially located across or behind a firewall, on a local network or the Internet. Access is controlled centrally, ensuring the security and privacy of sensitive information.

In addition, Gotomepc.com provides the ability to control access to specific applications or directories, including those located on LAN-connected file share servers. Remote printing allows printing to a client printer or other Internet printer.

To ensure improved performance and security, Gotomepc.com is not a domainjoined machine but runs as a service. This ensures a consistent user experience across all systems and satisfies the requirements of many organizations.

Gotomepc.com leverages existing and future security technologies to ensure a secure environment. For improved performance, Gotomepc.com also allows you to control access to specific applications or directories. This allows Gotomepc.com to keep up with the latest developments in security and performance.

The Gotomepc.com solution can be deployed in minutes without making any major investments in security or IT infrastructure. Gotomepc.com is designed to help you keep your business running smoothly and securely.

Conclusion

In summary, Gotomepc.com is a fast, reliable, easy-to-use remote access solution. This technology enables access to computers on your corporate network or from remote locations, reducing costs while improving productivity. And with Gotomepc.com's fast, reliable, easy-to-use remote access to the user's native computer, you'll have peace of mind that only an end-to-end solution can provide.
