Do more to protect your users from threats.

World-class security is now included in LogMeIn Central. Take control and mitigate the risk of cyber threats with our robust security module that includes application updates, Windows updates, and now, LogMeIn Antivirus. Powered by Bitdefender, our market-leading security programming delivers peace-of-mind for customers looking to protect their valuable data.

Feature	Benefit
Installation & Activation Replaces the computer's current antivirus solution* and installs LogMeIn Antivirus	• Install LogMeIn Antivirus right through your Central dashboard • Only three clicks to add protection to your endpoints
On-Demand Full Scan Examines the computer for all viruses, including scanning memory, hard drive and external devices connected to the computer (i.e., USB flash drive)	• Defend your systems against viruses and malware with full-scan protection • Gain visibility into any potential threats • Schedule your full scans to minimize end-user interruption
Quick Local Scan Examines virus-infected parts of the computer that are often targets of threats	• Pulse common targets for potential threats • Keep a constant watch on your critical systems
Real Time Protection (RTP) Inspects the computer's memory and file system continuously for threats during user interaction	• Watch for suspicious activity without interfering with system capabilities • Don't let a virus go unnoticed between scans
Firewall Controls computers' access to the network and to the Internet	• Allow access for known, legitimate applications while safeguarding your system • Protect against port scans and restrict unauthorized connection sharing
Update Virus Definition Updates virus definitions to reflect deviations in known threats	• Keep up to date with the latest threats • Protect your endpoints by preventing new threats from accessing your systems • Stay one step ahead of hackers
Reporting Reports on antivirus status (included in the Central Executive report)	• Gain instant insight into how your antivirus performs • Keep track of key antivirus metrics • Analyze the value of antivirus with key decision-makers
Policy Assignment Configures settings centrally for groups of computers, including scanning profiles and hiding antivirus from the end user	• Customize your antivirus protection to meet the needs of your organization
Multiple Policy Assignment Assigns differing antivirus policies to different groups in your organization	• Customize your antivirus protection within your organization • Gain the flexibility to assign the coverage you require
Exclusions Excludes folders or files from all scanning through central policies	• Make your antivirus fit your requirements
Central Antivirus Alerts Provides real-time antivirus alerts through Central's proactive alerting feature	• Stay on top of your risks with real-time alerts • Never let an attack go unnoticed
Traffic Scan Scans HTTP traffic for Malware	• Extends protection protocols to HTTP traffic
Suspend Capabilities Temporarily disable antivirus on machines when installing software	• Allows installation of software without uninstalling antivirus solution
Anti-phishing Identifies phishing content contained in websites, email, or other forms and blocks the content	• Protects your end-users from sophisticated phishing attempts
Device Control Select to automatically scan or block USB drives when connected to your computers	• Automatically scan USB drives to identify malicious software • Block USB drives to prevent users from accessing or exporting to a USB

*LogMeIn Antivirus removes only Kaspersky software.
