Central by LogMeIn

Critical Remote Monitoring and Endpoint Management

Mitigate the risk of cyber threats and proactively solve concerns before they become problems

#1
Voted **#1** Most Reliable Access Tool for SMBs

3.3B
Powers over **3.3 Billion** remote sessions and counting

10M
Over **10 Million** endpoints under management

Why Choose LogMeIn Central?

Complete Security for your Endpoint Infrastructure
Gain complete visibility and peace of mind while mitigating the risk of cyber threats with robust Security, Automation, and Monitoring functionality.

Time and Cost Savings
Manage and troubleshoot computers remotely to eliminate desk / onsite visits, manual installs, and waiting for computers to be unmanned.

Increased Productivity
Take back your time by automating routine IT tasks to simplify every facet of your business.

Best-in-Class Unattended Remote Access
Remotely manage all of your computers securely and troubleshoot issues without interrupting end users from one location – yours.

Simple to Use
Our intuitive interface ensures your team is up-and-running quickly so time to value is immediate.

Transform your business with the flexibility and freedom to pay for only what you need with LogMeIn Central's focused functionality modules.

START WITH THE BASE

Base
