Grow your business with LogMeIn Central

Drive key business growth and manage the diverse needs of your clients with reliable remote access and a robust remote monitoring and management solution.

Proactive remote support

Rely on best-in-class unattended remote access to eliminate site visits and stay ahead of any potential problems.

Increase productivity with IT automation

Keep customers up to date with critical patches without working overtime. Deploy and automate routine IT tasks including scripting, patch management and more to increase productivity, optimize resource allocation and maximize security.

Deliver an excellent customer experience

Focus on your customers, not complicated tech. Your time is valuable and a powerful solution doesn't need to be complex. Our intuitive interface allows you to get up and running quickly so you can continue driving value and delighting your customers.

Protect your customers from breaches and cyberthreats

Ensure all your customers' computers are online and supported with proactive alerts and monitoring, self-healing processes, antivirus management and more.

Trusted by the world's leading companies

ESTÉE LAUDER

"Having reliable and unattended remote access is absolutely critical, and LogMeIn Central allows us to proactively log in and send out mass updates before issues occur."

— Doug Demko, Shift4 Payments
