

Engaging boldly in sustainability initiatives.

At LogMeIn, we're fully committed to operating our business with integrity and reducing our environmental footprint.

LogMeIn's Corporate Social Responsibility program, Mission Possible, unlocks its people, products, and culture to create long-term, sustainable social and environmental impact that positively affects change in the world.

To lessen our overall impact on the environment, we're engaging boldly in sustainability activities that include:

Reducing greenhouse emissions at our facilities through energy conservation and energy efficiency. Matching 100% of our entire global electricity usage—including the estimated electricity usage of all employees working from home—with third party certified RECs moving towards Net Zero by 2030

Ensuring chosen data centers earn an A rating by Greenpeace

Responsibly managing and disposing of our electronic waste and using our recycling credits to support organizations partnered with Mission Possible

Creating office environments that promote conservation through water efficiency, source reduction, recycling, composting and the use of sustainable products

Engaging in sustainable procurement practices when possible

Fostering employee awareness through trainings and engagement programs

Replace the majority of face-to-face interactions with virtual meetings and procure certified carbon offsets to mitigate all emissions that we are unable to eliminate

Purchase certified carbon offsets to cover the fuel emissions of employee commute time

Our portfolio of products, solutions and services also help our users reduce their own environmental impact by enabling them to work and collaborate from anywhere and engage with each other and the world around them to drive meaningful insights, deeper relationships and better outcomes for all.
